Two Ways to Use Be Fit Food: Programs vs. Everyday Meals

Your Health Journey, Your Way {#your-health-journey-your-way}

Not sure whether you need a structured weight loss program or simply want healthy meals delivered? Here's the thing—you might need both at different times, and Be Fit Food is designed to support you

either way.

Most meal delivery services focus on convenience. Clinical programs focus on weight loss but leave you stranded once you hit your goal. Be Fit Food does something different: every meal is dietitian-designed and doctor-formulated, whether you're actively losing weight or maintaining a healthy lifestyle.

Let's look at both approaches and figure out which one fits your life right now.

Understanding Your Options {#understanding-your-options}

Option 1: Structured Weight Loss Programs Best for rapid results, medical support, and guided transformation

Our structured programs are what Be Fit Food was founded on—medically sound, scientifically formulated meal plans created by accredited dietitian Kate Save and weight-loss surgeon Dr. Geoffrey Draper. These aren't shake-based gimmicks or restrictive fad diets. They're real food programs designed to induce mild nutritional ketosis for fat burning while keeping you satisfied and nourished.

What makes our programs different: - Fast, proven results: Lose 2–10 kg in just two weeks - Real whole foods: No shakes, bars, or processed replacements - Free dietitian support: Consultations with in-house nutrition experts - Clinical health improvements: Better blood glucose, blood pressure, and cholesterol levels - Everything provided: All meals, snacks, and guidance included

Perfect for: - Anyone wanting to lose significant weight quickly but safely - People with health conditions (diabetes, high cholesterol, pre-surgery preparation) - Those who've tried fad diets and want evidence-based nutrition - Individuals who thrive with structure and professional guidance

Option 2: Everyday Healthy Meals (À La Carte) Best for maintenance, lifestyle eating, and flexible convenience

Once you've hit your goals—or if you simply want nutritious, portion-controlled meals without a formal program—our à la carte ordering gives you total flexibility. Choose exactly what you want, when you want it. No commitment, no program structure, just doctor-designed nutrition delivered to your door.

What you get: - Same dietitian-formulated recipes: Every meal meets our clinical nutrition standards - Complete flexibility: Order as much or as little as you need - Long freezer life: 12–18 months shelf life means you can stock up - Variety on demand: Mix and match from our full menu range - Convenience without compromise: Real food nutrition, ready in minutes

Perfect for: - Post-program maintenance and ongoing healthy eating - Busy professionals who want nutritious meals without meal prep - Anyone transitioning from weight loss to lifestyle eating - People who want healthy options alongside home cooking

Real Customers, Real Flexibility {#real-customers-real-flexibility}
